Harness Measurements

NOTE: It is very difficult to measure yourself accurately, so someone will need to assist. Use a soft measuring tape.

If there is an existing Mirage that fits you well or that you would like us to use for reference, list its serial # or harness size here.

Match serial # _____

I submitted my measurements in the online calculation form.

Gender Male Female

Height _____ in / cm = MLW _____

Weight _____ lbs / kg

Body Ratio To Legs Body is a bit short
 Body is medium
 Body is a bit long

Torso _____ = MLW _____

Long Girth _____ = MLW _____

I like my fit a little snug
 medium
 a little loose

Leg Pads _____ = LP _____

Waist _____ = STAB _____

Shoulders Normal
 Thick (lifts weights)

Chest / Cup (females) _____ = EXT _____

Throat to Belly Button _____ = STAG _____

Comments _____

For Office Use (unless you know what size you need) _____

<input type="checkbox"/> Adjustable				

Torso

- Measure both left and right as a double check.
- Measure from the BOTTOM of the hole at the base of your throat, diagonally over your chest, to the very TOP of your hip bone AT YOUR SIDE.
- The top of the hip bone is approximately the same height off the ground as your belly button.
- Common mistakes are measuring too low on the hip (too long), or not enough to the outside (too short).

Long Girth

- Measure from the bottom of the hole at the base of your throat (same as torso measurement), down through the crotch and up your back to the base of the collar (protruding spine bone on the back of the neck)
- Tape should be snug but not painful. Gentlemen, move things off to the side.

Leg Pads

- Measure both left and right as a double check.
- Take EVERYTHING OUT OF YOUR POCKETS.
- Measure around the leg, as the leg strap travels, up to the SIDE of your hip bone.
- Be sure to pull the tape SNUG.
- The measurement should be in the range of 28" – 34" for most people.
- Some people like their pads to overlap, some like the ends to just touch, and others like a few inches of gap. All of these are safe as long as you are sitting on the pad and your strap feeds through with at least 5-6 inches of tail.

Waist

- This part of the harness cannot be adjusted, so you should look at this measurement first when looking at stock rigs.
- Measure around your waist at your belly button.
- Do not pull your stomach in. Be certain the tape is level.

TIP: If you would like your rig to fit tighter against your back we recommend using our small sit fly belly band. It attaches to your hip rings via slinks and can be removed when not in use. We also offer a larger belly band for swooping.

Chest

- Measure at the nipples
- Be sure to measure all the way around your back and that the tape is level across your back.

Throat To Belly Button

- Measure from the bottom of the hole at the base of your throat (same as torso measurement), straight down to the center of the belly button.

Tip: The Mirage harness is designed to have the leg straps tightened first. Bend over as if touching your toes, slide the rig up your back and then tighten your legstraps until they are high and tight. You may need to rotate them slightly forward or back until they sit comfortably.
